INTRODUCTION

Applied Measurement Professionals, Inc. (AMP) provides a range of services to the states that use the Real Estate Appraiser Examination Program (RAP). This handbook provides information that you will need to register for the Alabama real estate appraiser licensing examinations. Be sure to keep the handbook after you have registered for the examination; you may wish to refer to it later.

The appraiser examinations are developed through a combined effort of appraisal experts and testing professionals. Real estate appraisers and educators write the questions. Experts in the fields of both real estate appraisal and testing review the questions to ensure that they are accurate in their content and representative of good question-writing procedures. All questions are revised and updated on a continual basis to reflect the current laws and practices in the changing real estate appraisal field.

The examination content outline used to develop the examinations is based on a job analysis conducted by the Appraiser Qualifications Board (AQB). It reflects areas of knowledge required to perform those tasks that practicing real estate appraisers judged to be important. Appraisal experts who write questions use this content outline as a guide. Thus, examinees are tested only on subjects judged by real estate appraisers as most important for licensees to know.

The content outline does not include topics that may be helpful to success in the industry. Since the purpose of licensure testing is to protect the consumer rather than to guarantee success in practice, the examinations focus on the knowledge you must have to protect the consumer and your ability to apply that knowledge to a consumer's particular situation. Similarly, the examinations include some technical language not used in your everyday conversations. You must learn that language to become a part of the profession and be able to explain its meaning to customers and clients.

EXAMINATION CONTENT

To begin your preparation in an informed and organized manner it is important to know what to expect from the actual examination in terms of the content. Information regarding the content of the examination you will be taking is presented in the following sections.

■ Appraiser Examination Specifications

The examination specifications and the detailed examination content outline have been established by the Appraiser Qualifications Board (AQB). The authority for the AQB to set standards and approve examination content was established by Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

The Trainee, State Licensed, Certified Residential and Certified General examinations are based upon 14 major content areas. Although the topics of the major content areas are the same for all four examinations, the emphasis devoted to the content areas differs in each examination.

Each of the content areas is briefly described in the following table. In addition, the percentage of questions devoted to each of the four examinations is indicated for each major content area. The Trainee is composed of 100 questions plus 5 unscored pretest questions. The State Licensed, Certified Residential and the Certified General are composed of 150 questions. In addition to the questions that are used to determine your score, the examinations may contain up to 15 questions that are being pretested for use in future versions of the examination. Pretest questions are not identified and are not included in your score.

The percentage of questions for the Trainee, State Licensed, Certified Residential, and Certified General Real Estate Appraiser Examinations within each category are shown on the following page.

Sample Questions

The following illustrate the type of questions used in the examinations. These sample questions do not represent the full range of content or difficulty levels contained in the examinations. They are intended to help you become familiar with the types and format of questions on the examination. Read each question and decide which answer is best. You may then check your answers with the answer key that follows.

- The subject property is a 10,000 sf office building encumbered by a full-service lease with a contract base rent of \$1.25 per sf monthly. Stabilized vacancy/credit loss allowance for similar properties within the market area is 7% of PGI. The operating expense ratio for similar properties is 30% of EGI, plus reserves for replacement of \$0.15 per sf. Based on these facts, what is the projected net operating income?
 - \$97,650
 - \$93,000
 - \$96,150
 - \$94,500

- The assignment is a warehouse located in an industrial park. The client requires the cost approach be completed. There are no vacant land comparables in the market area. There are 3 sales of commercial buildings in the industrial park with similar lots that the appraiser has researched extensively. The appraiser found the following information:

Sale 1 sold for \$1,750,000. The buyer allocated 20% of the value to the site and 80% to the value of the structure.

Sale 2 sold for \$1,000,000. The buyer was not available for verification, but the seller was available. The seller had just built the structure after holding the lot for 10 years as an investment property. He paid \$100,000 for the lot and had earned 25% straight line annual return on his investment over the cost of the structure and its entrepreneurial profit.

Sale 3 sold for \$3,500,000. The buyer estimated that 90% of what he paid was for the structure.

What is the indicated value of the lot using the allocation approach?

- \$350,000
 - \$500,000
 - \$135,000
 - \$125,000
- During the research of a subject property an appraiser learns the occupants (parents) have been granted a life estate by their children. What interest do the children hold in the property?
 - Remainderman
 - Life tenant
 - Trustee
 - Trustor
 - An homeowner purchased two adjacent lots in a tract subdivision 20 years ago and built a single-unit residence entirely on one lot, utilizing the second lot as a side yard. The homeowner has decided to build a smaller home on the vacant side lot and retain the existing home as a rental. What term applies to the second yard?
 - Surplus land
 - Vacant site
 - Excess land
 - Underutilized site

5. The subject assignment is to appraise a 1880s vintage house using the cost approach. The house has metal stamped ceilings, lath and plaster walls, which are items not easily available in today's construction. The estimated replacement cost using modern materials is \$120 per sf. Contractors charge \$15 more per sf to work on older houses. The estimated reproduction cost is \$185 per sf. What is the estimated loss in utility?
 - A. \$65 per sf
 - B. \$33 per sf
 - C. \$80 per sf
 - D. \$15 per sf

6. While working on an appraisal of a residential property in a new home subdivision, the appraiser finds that the builders have a total of 100 home sites currently offered for sale. In measuring market demand the appraiser notes that all of the builders are currently averaging 2 new sales contracts per month (combined), and are expecting to sell 24 homes within the next year. What conclusion could be drawn with regard to the 100 available home sites and a market period of the next 12 months?
 - A. The market is in a condition of supply and demand.
 - B. The market is in a condition of balance.
 - C. The market is in a condition of oversupply.
 - D. The market is in a condition of undersupply.

You will take your photograph which will remain on screen throughout your examination session. This photograph will also print on your score report.

Prior to attempting the examination, you will be given the opportunity to practice taking an examination on the computer. The time you use for this practice examination is NOT counted as part of your examination time or score. When you are comfortable with the computer testing process, you may quit the practice session and begin the timed examination.

■ Timed Examination

Following the practice examination, you will begin the actual examination. Before beginning, instructions for taking the examination will be provided on-screen. The following time limits will be in effect for each examination.

Examination	Time Allotted
Trainee	3½ hours
State Licensed Appraiser	6 hours
Certified Residential Appraiser	6 hours
Certified General Appraiser	8 hours

The computer monitors the time you spend on the examination. The examination will terminate if you exceed the time allowed. You may click on the "Time" box in the lower right portion of the screen or select the Time key to monitor your time. A digital clock indicates the time remaining for you to complete the examination. The Time feature may be turned off during the examination.

Only one examination question is presented at a time. The question number appears in the lower right portion of the screen. Choices of answers to the examination questions are identified as A, B, C, or D. You must indicate your choice by either typing in the letter in the response box in the lower left portion of the computer screen or clicking in the option using the mouse. To change your answer, enter a different option by pressing the A, B, C, or D key or by

clicking on the option using the mouse. You may change your answer as many times as you wish during the testing time limit.

To move to the next question, click on the forward arrow (>) in the lower right portion of the screen or select the NEXT key. This action will move you forward through the examination question by question. If you wish to review any question, click the backward arrow (<) or use the left arrow key to move backward through the examination.

An examination question may be left unanswered for return later in the testing session. Questions may also be bookmarked for later review by clicking in the blank square to the right of the Time button. Click on the hand icon or select the NEXT key to advance to the next unanswered or bookmarked question on the examination. To identify all unanswered and bookmarked questions, repeatedly click on the hand icon or press the NEXT key. When the examination is completed, the number of examination questions answered is reported. If not all questions have been answered and there is time remaining, return to the examination and answer those questions. Be sure to provide an answer for each examination question before ending the examination. There is no penalty for guessing.

■ Candidate Comments

During the examination, comments may be provided for any question by clicking on the button displaying an exclamation point (!) to the left of the Time button. This opens a dialogue box where comments may be entered. Comments will be reviewed, but individual responses will not be provided. You will not be given additional time to provide comments.

FOLLOWING THE EXAMINATION

■ Scoring the Examination

The passing score reflects the amount of knowledge that a committee of experts has determined to be appropriate for licensure. A criterion-referenced, standard-setting procedure involving expert judgment was used to evaluate each question on the entire examination in order to identify an appropriate passing point. Your ability to pass the examination depends on the amount of knowledge that you display, and not on the performance of the other individuals taking the examination.

As new forms of the examination are introduced, a certain number of questions in each content area are replaced by new questions. Questions are selected for inclusion on an examinations form to ensure that it exactly matches the detailed content outline as well as a target difficulty range. By including questions at the specified range of difficulty,

the overall difficulty level of the examination remains stable. This means that the passing point consistently reflects the same level of knowledge of real estate appraisal. The goal of this procedure is to ensure fairness to all candidates.

After completing the examination, you are asked to provide responses to a short evaluation of your examination experience. Then, you are instructed to report to the proctor to receive your instant score report. Scores are reported in written form only, in person or by U.S. mail. Please do not call AMP or the Board for score information; scores are not reported by telephone, electronic mail or facsimile.

■ If You Pass the Examination

If you pass the examination, the score report will indicate that the examination has been passed. Follow the instructions listed on the bottom of the score report in order to obtain a license.

■ If You Do Not Pass the Examination

If you fail the examination, you will receive a diagnostic score report showing your score. Your score report will also show your scores on major content areas of the examination. The examination may be retaken by rescheduling an appointment for testing online at www.goAMP.com or by calling AMP at 800/345-6559. There is no limit to the number of times a candidate may take the examination within their 2-year eligibility period.

■ Score Averaging

It is important to keep in mind that your total score is not the average of the subscores provided for each of the major content areas. This is because some content areas contain larger numbers of questions than others. Your total percentage score reflects the number of questions that you answered correctly divided by the total number of questions.

■ Duplicate Score Report

You may purchase additional copies of your score report at a cost of \$15 per copy. Requests must be submitted to AMP, in writing, within one year after the examination and include the required fee payable to AMP (see form on page 15). The written request should include your name, Social Security number, mailing address, daytime phone, examination taken, examination date, Assessment Center and your signature. Duplicate score reports will be processed and mailed within approximately two weeks following receipt of the request.
